Date: February 1, 2012

RE: Report Required by K.S.A 2011 Supp. 66-2005 as amended by SB 350, HB 2637 and SB 72

The attached report is provided pursuant to the requirements of K.S.A 2011 Supp. 66-2005 as amended by SB 350, HB 2637 and SB 72 which were enacted by the 2006, 2008 and 2011 Legislatures, respectively.

The attached report provides the required data and analyses, including the following information regarding telecommunications services in Kansas:

- The statewide, weighted average price of "nonwireless" basic local service, residential and business as of July 1, 2006;
- The weighted, average rate of nonwireless basic local telecommunications services in exchanges that have been price deregulated pursuant to subsection (q)(1)(B)(C) or (D);
- The price and service offerings provided by all telecommunications carriers or other telecommunications service providers regardless of the technology used and available in the price deregulated exchanges; and,
- The number of competitors in the price deregulated exchanges.

Feel free to contact me directly with questions at 785.271-3166 or p.petersen-klein@kcc.ks.gov.

Respectfully Submitted,

Patti Petersen-Klein
Executive Director

**2012 REPORT
TO THE KANSAS LEGISLATURE
ON PRICE DEREGULATION**

PROVIDED
PURSUANT TO
K.S.A. 2011 Supp. 66-2005

Report on Price Deregulation

Provided Pursuant to K.S.A. 2011 Supp. 66-2005 as Amended by SB 350, HB 2637 and SB 72

I. Introduction

In 1996, both Congress and the Kansas Legislature enacted sweeping changes in the laws governing telecommunications services in the form of the Federal Telecommunications Act of 1996 and the Kansas Telecommunications Act of 1996. The Kansas Telecommunications Act of 1996 sets forth specific, overarching public policy goals upon which the Act was constructed, and which the Legislature intended to be accomplished. Those goals are to:

- (a) ensure that every Kansan will have access to a first class telecommunications infrastructure that provides excellent service at an affordable price;
- (b) ensure that consumers throughout the state realize the benefit of competition through increased services and improved telecommunications facilities and infrastructure at reduced rates;
- (c) promote consumer access to a full range of telecommunications services, including advanced telecommunications services that are comparable in urban and rural areas throughout the state;
- (d) advance the development of a statewide telecommunications infrastructure that is capable of supporting applications, such as public safety, telemedicine, services for persons with special needs, distance learning, public library services, access to internet providers, and others; and
- (e) protect consumers of telecommunications services from fraudulent business practices that are inconsistent with the public interest, convenience and necessity. K.S.A. 66-2001.

Deciding whether these goals have been met, and thus, deciding that it is appropriate to grant price deregulation, is a matter of public policy. The original provisions of the Kansas Telecommunications Act of 1996 granted the authority to determine whether telecommunication services or exchanges were to be deregulated to the Kansas Corporation Commission (KCC or Commission). Over the years, there have been amendments to the statute intended to modify the manner by which to determine whether there is sufficient competition to warrant price deregulation. As a part of those amendments, the Commission has been required to keep track of certain data for determining whether adequate competition exists to warrant price deregulation and provide certain protections against unreasonable pricing if competition is not sufficient to discipline price, and report to the Legislature such data with, findings and recommendations where appropriate. Reports in prior years have included the following information:

- The Kansas telecommunication exchanges that have been price deregulated;
- The statewide, weighted average price of “nonwireless” basic local service, residential and business, as of both July 1, 2006 and July 1, 2008;
- The current inflation-adjusted statewide average price, based on the 2008 statewide, weighted average price;
- The weighted, average price in the price deregulated exchanges;
- The price for such service in deregulated exchanges, as of the dates such exchanges were deregulated;
- Changes in service offerings available in the price deregulated exchanges; and,
- The change in the number of competitors in the price deregulated exchanges.

Additionally, and in compliance with the statutory scheme, prior reports provided an analysis of the effect of price deregulation on consumers and the status of competition in the price deregulated exchanges.

The statutory reporting requirements for the report for 2012 have changed due to legislation passed during the 2011 session. The 2011 Kansas Legislature passed Senate Bill 72, which was signed into law by Governor Brownback on April 14, 2011. K.S.A 2011 Supp. 66-2005, at subsection q, requires that the Commission:

(6) . . . on July 1, 2006, and on each date that any service is deregulated, shall record the rates of each service which has been price deregulated in each exchange.

(7) Prior to January 1, 2007, the commission shall determine the weighted, statewide average rate of nonwireless basic local telecommunications service as of July 1, 2006. Prior to January 1, 2007, and annually thereafter, the commission shall determine the weighted, average rate of nonwireless basic local telecommunications services in exchanges that have been price deregulated pursuant to subsection (q)(1)(B), (C) or (D). The commission shall report its findings on or before February 1, 2007, and annually thereafter to the governor, the legislature and each member of the standing committees of the house of representatives and the senate which are assigned telecommunications issues. The commission shall also provide in such annual report information on the current rates for services provided by all telecommunications carriers or other telecommunications service providers regardless of the technology used to provide service in price deregulated exchanges, service offerings provided by all telecommunications carriers or other telecommunications service providers regardless of the technology used and available in price deregulated exchanges and the number of competitors in price deregulated exchanges including, but not limited to, facilities based carriers, commercial mobile radio service or broadband based service providers.

Based on the foregoing, the Commission provides the following information regarding telecommunications services in Kansas:

- The Kansas telecommunication exchanges that have been price deregulated pursuant to K.S.A. 66-2005(q)(1)(B)(C) or (D) (Section II);
- The statewide, weighted average price of “nonwireless” basic local service, residential and business, as of both July 1, 2006 and July 1, 2008 (Section III);
- The weighted, average price in the exchanges price deregulated pursuant to K.S.A. 66-2005(q)(1)(B)(C) and (D) (Section IV);
- Information on the current rates and service offerings provided by telecommunications carriers in price deregulated exchanges (Section V); and,
- The number of competitors in price deregulated exchanges including, but not limited to, facilities based carriers, commercial mobile radio service or broadband based service providers (Section VI).

II. Price Deregulated Exchanges

K.S.A. 2011 Supp. 66-2005(q)(1)(B)(C) and (D) govern the price deregulation of exchanges for price cap carriers and that are the subject of this report. K.S.A. 66-2005(q)(1)(B)(C) and (D) state:

(B) in any exchange in which there are 75,000 or more local exchange access lines served by all providers, rates for all telecommunications services shall be price deregulated;

(C) in any exchange in which there are fewer than 75,000 local exchange access lines served by all providers, the commission shall price deregulate all business telecommunication services upon a demonstration by the requesting local telecommunications carrier that there are two or more nonaffiliated telecommunications carriers or other entities, that are nonaffiliated with the local exchange carrier, providing local telecommunications service to business customers, regardless of whether the entity provides local service in conjunction with other services in that exchange area. One of such nonaffiliated carriers or entities shall be required to be a facilities-based carrier or entity and not more than one of such nonaffiliated carriers or entities

shall be a provider of commercial mobile radio services in that exchange;

(D) in any exchange in which there are fewer than 75,000 local exchange access lines served by all providers, the commission shall price deregulate all residential telecommunication services upon a demonstration by the requesting local telecommunications carrier that there are two or more nonaffiliated telecommunications carriers or other entities, that are nonaffiliated with the local exchange carrier, providing local telecommunications service to residential customers, regardless of whether the entity provides local service in conjunction with other services in that exchange area. One of such nonaffiliated carriers or entities shall be required to be a facilities-based carrier or entity and not more than one of such nonaffiliated carriers or entities shall be a provider of commercial mobile radio services in that exchange.

There are 570 telephone exchanges within the state of Kansas and 254 of those exchanges are served by the two incumbent local exchange carriers that have elected price cap regulation, Southwestern Bell Telephone Company d/b/a AT&T Kansas (AT&T)¹ and United Telephone Companies of Kansas d/b/a CenturyLink (CenturyLink).² AT&T is the incumbent local exchange carrier in 134 exchanges and CenturyLink is the incumbent in 119 exchanges.

Over the five years since the price deregulation statute (K.S.A. 66-2005(q)(1)(B)(C) and (D)) was implemented, 59 exchanges were price deregulated pursuant to the aforementioned statute and all 59 exchanges are served by AT&T. A map illustrating the exchanges served by the price cap carriers that have been price deregulated pursuant to subsection (q) is attached to this report as Appendix A.

¹ AT&T is affiliated with the following telecommunications carriers that operate in Kansas: TCG Kansas City, Inc., AT&T Communications of the Southwest, Inc., AT&T Corp. d/b/a AT&T Advanced Solutions, SBC Long Distance, LLC, Bell South Long Distance, Inc. d/b/a AT&T Long Distance, SNET America, Inc. d/b/a AT&T Long Distance East, and New Cingular Wireless PCS, LLC ("AT&T Mobility").

² United Telephone Company of Kansas, United Telephone Company of Eastern Kansas, United Telephone Company of Southcentral Kansas, Sprint Missouri, Inc. d/b/a United Telephone Company of Southeastern Kansas (collectively, United Telephone Companies of Kansas d/b/a Embarq) merged with CenturyTel, Inc. on July 1, 2009. The combined company is now known as CenturyLink. In Kansas, the United Telephone Companies of Kansas retained their legal names and have adopted the new d/b/a name of CenturyLink.

Three AT&T exchanges (Kansas City, Topeka, and Wichita) have 75,000 or more access lines and thus were automatically deemed price deregulated on July 1, 2006, the effective date of the 2006 amendment. K.S.A. 2006 Supp. 66-2005(q)(1)(B). Forty-five exchanges have been price deregulated for both business and residential services following a demonstration by AT&T that the requirements of K.S.A. 66-2005(q)(1)(C) and (D) had been met for each of the exchanges. One exchange has been price deregulated for only business services following a demonstration by AT&T that the requirements of K.S.A. 66-2005(q)(1)(C) had been met. Ten exchanges have been price deregulated for only residential services following a demonstration by AT&T that the requirements of K.S.A. 66-2005(q)(1)(D) had been met.

A full list of the price deregulated exchanges, together with Commission proceeding-specific information associated with the deregulation, is attached to this report as Appendix B.

It should be noted that Legislation passed during the 2011 Legislative session (Senate Bill 72) provides that any local exchange carrier with a majority of the carrier's local exchange access lines in the state price deregulated pursuant to subsection (q) may elect to no longer be regulated as a local exchange carrier and, notwithstanding any other provisions, upon such election shall instead be regulated as a telecommunications carrier. A local exchange carrier making such election shall be referred to as an "electing carrier." Pursuant to this statute (K.S.A. 66-2005(x)), AT&T filed a notification on July 7, 2011, of its election to be regulated as an "electing carrier" effective October 7, 2011. Thus, effective October 7, 2011, all 134 of AT&T's exchanges are price deregulated.

K.S.A. 66-2005(q)(7) outlines the information to be included in this report and it does not include the exchanges price deregulated pursuant to K.S.A. 66-2005(x), but rather focuses on the exchanges price deregulated pursuant to K.S.A. 66-2005(q)(1)(B)(C) and (D). Thus, the 75

exchanges that were automatically deemed price deregulated on October 7, 2011, pursuant to K.S.A. 66-2005(x) are not included in this report.

III. Weighted, Statewide Average Rate for Nonwireless Residential and Single-Line Business Service

Pursuant to K.S.A. 2006 Supp. 66-2005(q)(7), the Commission calculated the weighted, statewide average rate for nonwireless residential and single-line business service as of July 1, 2006. As will be more fully explained, this weighted, statewide average rate for “basic local telecommunications service”³ is the indicator that was used in the statute to determine the effectiveness of competition in price deregulated exchanges. The data used for making this determination was derived from data requested of all incumbent local exchange carriers and competitive local exchange carriers regarding rates for basic local service and the corresponding number of access lines served. As reported in prior annual telecommunication reports, the weighted, statewide average rate for nonwireless residential and single-line business service as of July 1, 2006 is:

\$15.53 for residential service, and

\$26.37 for single-line business service.

K.S.A. 2006 Supp. 66-2005(q)(7) was again amended in 2008 by the passage of House Bill 2637. The amendment requires the Commission to calculate the weighted, statewide average rate of nonwireless basic local telecommunications service as of July 1, 2008. The Commission, again, sent data requests to all incumbent local exchange carriers and competitive local exchange carriers. From this information, the weighted, statewide average rate for nonwireless residential and single-line business service as of July 1, 2008 was calculated to be:

³ “Basic local telecommunications service” is a stand-alone telephone line without any additional features.

\$15.85 for residential service, and

\$27.74 for single-line business service.

IV. Weighted Average Rate in Price Deregulated Exchanges

The Commission is also required to determine and advise as to the weighted average rate of nonwireless basic local telecommunications services in exchanges that have been price deregulated pursuant to subsection (q)(1)(B), (C), or (D) on an annual basis. Therefore, the Commission calculated such rates for residential and single-line business service in AT&T's exchanges which have been price deregulated.⁴ Table 1 is the result of those calculations.

Table 1: Weighted, Average Rate in Price Deregulated Exchanges

Exchange	Weighted, Average Residential Rate	Weighted, Average Business Rate
Kansas City	\$17.45	\$31.96
Topeka	\$16.78	\$29.93
Wichita	\$16.84	\$30.47
Abilene	\$15.70	N/A
Almena	\$15.70	\$26.81
Arkansas City	\$15.70	\$29.14
Basehor	\$21.25	\$15.01
Chanute	\$15.73	N/A
Cheney	\$16.14	\$28.97
Cherryvale	\$16.14	\$28.71
Clay Center	\$20.19	N/A
Clinton	N/A	\$28.20
Coffeyville	\$16.23	\$28.94
Colby-Gem	\$13.20	\$22.17
DeSoto	\$16.07	\$28.40
Dodge City	\$16.46	\$28.84
El Dorado	\$16.36	\$28.72
Ellsworth	\$15.70	N/A
Emporia	\$15.73	N/A
Erie	\$16.04	\$28.75

⁴ The Commission did not calculate the weighted average rate in the Clinton exchange for residential service because AT&T was granted price deregulation pursuant to K.S.A. 66-2005(q)(1)(C) in the Clinton exchange for only business service. Likewise, the Commission did not calculate the weighted average rate in the Abilene, Chanute, Clay Center, Ellsworth, Emporia, Hoxie, Independence, Neodesha, Parsons, and Yates Center for business service because AT&T was granted price deregulation pursuant to K.S.A. 66-2005(q)(1)(D) in those exchanges for only residential service.

V. Information on Rates and Service Offerings Provided by Telecommunications Carriers
in Price Deregulated Exchanges

Pursuant to the statute as revised by the 2011 Kansas Legislature, the Commission is required to provide information on the current rates and service offerings provided by telecommunications carriers or other telecommunications service providers regardless of the technology used to provide service in price deregulated exchanges. In order to accomplish this task, the Commission sent a request for data to all jurisdictional and non-jurisdictional telecommunications providers reportedly operating in the state of Kansas. The Commission does not have jurisdiction over many of the carriers to which it sent the information request; thus, the responses received were limited to those it does have jurisdiction over and a limited number of non-jurisdictional providers who elected to cooperate.

A. Statewide or in all 59 of the Price Deregulated Exchanges

The following carriers indicate they offer service either on a statewide basis or in all 59 price deregulated exchanges discussed in this report.

1. Wireless Carriers

Coast2Coast Cellular provides calling plans from \$29.99 for 300 minutes per month to \$54.99 for 900 minutes per month, unlimited night and weekend calling, Caller ID, Call Forwarding, Call Waiting, 3-Way Calling and voicemail service. Customers may pay \$.08 per text or \$20.00 for unlimited texting per month. Data packages range from \$1.50 per Megabyte (MB) to \$39.99 per month for unlimited data usage.

Sprint Nextel offers service plans ranging from \$29.99 for 200 minutes of calling per month to \$99.99 per month for unlimited calling. Monthly data plans can be added for \$34.99 for 3 Gigabytes (GB) to \$79.99 for 12 GB.

T-Mobile offers service plans ranging from a flat \$15.00 rate for unlimited text, voicemail, Caller ID and Call Waiting service and \$.10 for each voice minute to \$119 for unlimited voice, unlimited text, up to 10 GB of data, voicemail, Caller ID and Call Waiting.

Total Call Mobile offers service plans from a flat charge of \$10 per month and \$.03 per voice minute, \$.01 per text message, and \$.05 per MB of data usage to \$55 per month for unlimited voice and text and \$.05 per MB with 300 MB included in the package.

Verizon Wireless and AT&T Wireless, similarly, offer service plans ranging from \$39.99 for 450 anytime minutes to \$69.99 for unlimited voice minutes. The plans include voicemail, Call Waiting, Caller ID, and Call Forwarding. Data plans can be added for rates starting at \$2.00 per MB for AT&T and \$1.99 per MB for Verizon.

WDT Wireless offers service plans ranging from \$19.99 per month for 400 voice minutes, Caller ID and voice mail to \$39.99 per month for unlimited calling, Caller ID and voice mail.

2. Competitive Local Exchange Carriers

Comtech 21, LLC offers service from \$32.95 for basic local service to \$47.95 for local service with unlimited usage. Granite Telecommunications, LLC offers business service from \$28.20 to \$55.00. Nexus Communications offers residential service from \$29.95 to \$39.95 per month.

MCImetro Access Transmission Services LLC offers service packages for residential consumers ranging from \$44.99 per month for unlimited local calling, voicemail, Call Waiting, Caller ID and 200 long distance calling minutes to \$59.99 per month for unlimited local calling, voicemail, Call Waiting, Caller ID and unlimited long distance calling. Business services range from \$51.99 per month for local basic to \$61.99 for local complete service.

Sage (Sage) Telecom offers residential service from \$23.99 to \$48.99 per month. Calling Features such as Caller ID, Call Waiting, Call Waiting ID, Call Forwarding, Three-Way Calling and Home Wire Maintenance are included at no additional charge. Sage also offers business service ranging from \$37.00 per month to \$55.99 per month with Caller ID, Call Waiting, Call Forwarding and Multi-Line Hunting are included at no additional charge.

3. Voice over Internet Protocol (VoIP) Providers

As with all VoIP service, the customer must have broadband in order to subscribe to and utilize the VoIP service. Thus, if the customer does not have access to broadband or does not subscribe to broadband service, the customer cannot subscribe to the VoIP service.

AT&T's U-Verse Voice service offerings start at \$25.00 per month for 250 minutes of calling to anyone in the United States, Canada and Puerto Rico to \$40.00 per month for unlimited calling to anyone in the U.S., U.S. territories, and Canada. Plans include call management services including Call Blocking, Call Forwarding, Call Waiting, Caller ID, Exclusive Call Forwarding, 3-Way Calling, Anonymous Call Rejection, Busy Call Forwarding, Call History, Call Screening, Call Transfer, Caller ID Blocking, and voicemail. U-Verse TV, Internet and Phone bundles start at \$89 per month to \$162 per month.

Allvoi offers VoIP calling packages ranging from \$13.99 to \$17.99 per month. Enteleagent's service offerings range from \$22.99 for measured service, \$33.99 for flat usage, and \$38.99 for its bundled offerings.

Globalinx offers service starting at \$24.95 for unlimited residential local calling, long distance, and mobile calls anywhere in the United States to \$44.95 for unlimited video service for businesses that includes unlimited free calling in the United States, Canada and Puerto Rico, voicemail, Caller ID, Call Forwarding, and Call Waiting.

Qwest Communications Company LLC d/b/a CenturyLink QCC offers VoIP service to large business and enterprise customers in Kansas, including managed VoIP, trunk and integrated access service. Rates start at \$635 for a bundle with a 36-month agreement.

Unison Communications offers interconnected voice service to primarily business customers for a flat monthly rate of \$25 per customer. Voipstreet offers VoIP service for \$1.39 per phone number per month and \$.012 per voice minute. Voip innovations provides VoIP service for large business customers for \$.50 per phone number per month and \$.001 per minute of voice usage.

ViaTalk offers residential calling plans starting at \$10.95 for 2,000 calling minutes, voicemail, Caller ID and Call Waiting to \$16.95 for unlimited calling minutes, voicemail, Caller ID and Call Waiting.

B. Service Offerings by Exchange

Kansas City Metro

- Access Point offers residential service offerings for \$15.70 per month and business service offerings from \$30.65 to \$45 per month.
- AT&T offers residential service for \$18.00 per month and \$35.00 per month for business service. Call management services can be added for an additional charge, including Caller ID for \$9.95, Call Waiting for \$8.50 and Three-Way Calling \$4.25.
- AT&T Communications of the Southwest Inc. (AT&T Communications of the Southwest) offers business service for \$39.95 per month.

- Birch Telecom of Kansas, Inc.'s (Birch Telecom) residential service offerings range from \$34.49 to \$46.95 per month and its business offerings range from \$34.26 to \$46.09 per month.
- Broadview Networks, Inc. offers business service for \$28.20 per month.
- Budget Prepay, Inc. d/b/a Budget Phone (Budget Prepay) offers residential service packages from \$39.95 to \$49.95 per month.
- Bullseye Telecom, Inc. (Bullseye) offers business service ranging from \$14.99 to \$44.43 per month.
- Cincinnati Bell Any Distance, Inc. offers business service for \$38.00 per month.
- Connect Insured Telephone d/b/a Connect IT (Connect IT) offers residential service for \$36.26 per month and business service ranging from \$37.90 to \$39.90 per month.
- First Communications, LLC (First Communications) offers residential service for \$25.52 per month.
- Global Crossing Local Services, Inc. (Global Crossing) offers business service from \$20.00 to \$45.25 per month.
- Knology of Kansas, Inc. (Knology) offers residential service for \$14.95 to \$44.95 per month and business service offerings from \$25.35 to \$40.30 per month.
- Level 3 Communications LLC (Level 3) offers business service for \$30.15 to \$31.20 per month.
- Lightyear Network Solutions, LLC (Lightyear) offers residential service from \$40.99 to \$57.99 per month and business service from \$39.00 to \$40.00 per month.

- Logix Communications Corporation (Logix) offers business service for \$41.41 per month.
- McLeodUSA Telecommunications Services, LLC (McLeodUSA) offers business packages ranging from \$16.00 to \$49.85.
- Matrix Telecom, Inc. (Matrix) offers residential service for \$36.52 to \$78.05 per month and business service from \$31.56 to \$75.57 per month.
- Metropolitan Telecommunications of Kansas, Inc. (Metropolitan) offers service to business customers at rates ranging from \$19.35 to \$33.99 per month.
- Navigator Telecommunications, LLC (Navigator) offers service to residential customers for \$12.56 per month and business customers for \$30.65 per month.
- Quantumshift Communications Company, Inc. (Quantumshift) offers business service for \$31.95 per month.
- Rosebud Telephone, LLC (Rosebud) offers business service for \$23.65 per month.
- SureWest Kansas Licenses, Inc. (SureWest) offers residential service for \$12.75 per month and business service from \$22.95 to \$31.95 per month.
- TCG Kansas City, Inc. (TCG Kansas City) offers service to business customers at rates ranging from \$47.95 per month to \$54.95 per month.
- Time Warner Cable Information Services (Kansas), LLC (Time Warner) offers residential service at rates ranging from \$39.95 to \$49.95 per month and business service from \$39.95 to \$54.95 per month.
- TW Telecom of Kansas City LLC offers business service for \$32.00 per month.

- Windstream NuVox Kansas, Inc. (Windstream NuVox) offers business service from \$10.03 to \$39.37 per month.
- YourTel America, Inc. (YourTel America) offers residential service for \$29.95 per month and \$39.95 for business service.

Topeka Metro

- AT&T offers residential service for \$18.00 per month and \$35.00 per month for business service. Call management services can be added for an additional charge, including Caller ID for \$9.95, Call Waiting for \$8.50 and Three-Way Calling \$4.25.
- Birch Telecom's residential service offerings range from \$34.49 to \$46.95 per month and its business offerings range from \$34.26 to \$46.09 per month.
- Budget Prepay offers residential service packages from \$39.95 to \$49.95 per month.
- Bullseye offers business service ranging from \$14.99 to \$44.43 per month.
- CenturyTel Acquisition LLC d/b/a CenturyLink Acquisition offers business services ranging from \$12.42 per month to \$550 per month.
- Connect IT offers residential service for \$36.26 per month and business service ranging from \$37.90 to \$39.90 per month.
- Cox Kansas Telcom, LLC d/b/a Cox Communications (Cox) residential service offerings range from \$16.99 to \$58.62 per month and business service for \$30.15 per month.
- Global Crossing offers business service for \$39.75 per month.
- Level 3 offers business service for \$30.15 to \$31.20 per month.

- Lightyear offers residential service from \$40.99 to \$57.99 per month and business service from \$39.00 to \$40.00 per month.

VI. Conclusion

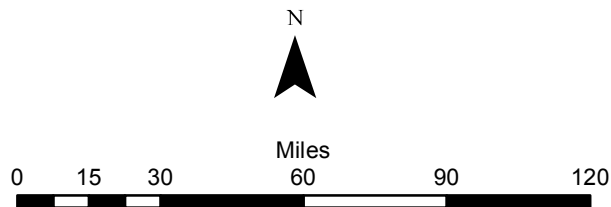

Advances in technology has allowed for new types of telecommunications service offerings and providers to enter the market. Many Kansans have access to telecommunications services via their traditional landline local exchange carrier, wireless carriers, VoIP providers, cable providers and some residents even have access to satellite providers. However, it should be mentioned that although these technologies and deployment of such technologies have come a long way, not every Kansan has access to all of these services. Companies typically deploy services where it makes economic sense to do so, which is traditionally in areas with large population bases. Thus, although a provider may provide service in the “city”, residents outside of the city center may not have access to such services. Nonetheless, overall Kansans continue to have greater access to new technologies, new offerings and new service providers.
